

Tween 80

Cat. No.:	HY-Y1891
CAS No.:	9005-65-6
Target:	Biochemical Assay Reagents
Pathway:	Others
Storage:	Pure form -20°C 3 years 4°C 2 years

Tween 80

SOLVENT & SOLUBILITY

In Vitro	DMSO : ≥ 100 mg/mL * " \geq " means soluble, but saturation unknown.
----------	--

BIOLOGICAL ACTIVITY

Description	Tween 80 (Polysorbate 80), a surfactant, has been widely used as a solvent for pharmacological experiments. Tween 80 can also reduce bacterial attachment and inhibit biofilm formation.
In Vitro	Tween 80 (Polysorbate 80) is a surfactant which can also reduce bacterial attachment and inhibit biofilm formation ^[1] . Solubility enhancement as high as 100-fold is achieved using 1% Tween 80 in vitro ^[2] . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
In Vivo	Tween 80 (Polysorbate 80) (IP; 10 ml/kg) significantly decreases locomotor activity at a concentration of 32% in saline (v/v) in male outbred (BALB/c x DBA/Z)F1 mice weighing 24-30 g ^[3] . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
